

# Luca Conte

*Senior Software Architect & Technical Alchemist*

## Summary

Experienced software Architect and Developer with over 20 years of experience designing, developing, and deploying scalable applications. Specializing in backend development, system architecture, and — driven by strong personal inspiration — creative technology.

## Skills

|                 |                                                                         |
|-----------------|-------------------------------------------------------------------------|
| Languages       | Java, C++, Python, Bash/Zsh                                             |
| Frameworks      | Spring Boot, Apache Flink, Kafka Streams                                |
| DevOps          | Docker, Jenkins, Git                                                    |
| Creative Coding | openFrameworks, GLSL, Processing, p5.js                                 |
| Tools           | Neovim, IntelliJ, Pycharm, CLion, Makefile, Maven, Docker, Jenkins, Git |
| Sound           | Elektron Octatrack, Eurorack Modular, Pure Data, Tidal Cycles           |

## Experience

|              |                                                                                                    |
|--------------|----------------------------------------------------------------------------------------------------|
| 2016–Present | <b>IT Architect/Developer in the R&amp;D department</b> , <i>Targa Telematics</i> , Treviso, Italy |
| 2006–2016    | <b>IT Architect/Senior Software Developer</b> , <i>Sinesy</i> , Oderzo - Italy                     |

## Education

|           |                                                                           |
|-----------|---------------------------------------------------------------------------|
| 1996–2002 | <b>Master's Degree in Computer Science</b> , <i>Ca' Foscari Venezia</i>   |
| 1990–1995 | <b>High School Diploma in Electronics</b> , <i>ITIS Max Plank Treviso</i> |

## Projects

|                 |                                                                                                                                                                                                                                                      |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Xynthesi</i> | AI-driven audio-visual installation created using Stable Diffusion and generative modular sound synthesis. Showcased at a modular music camp                                                                                                         |
| Moulding Mold   | Moulding Mold is real-time audioreactive and generative system built in Processing (and ported in openFrameworks), simulating the collective behavior of 50,000 virtual agents inspired by the plasmodial dynamics of <i>Physarum polycephalum</i> . |
| ofLockward      | A real-time audioreactive implementation in openFrameworks of lockward: Rotating spinning color-cycling blinking things                                                                                                                              |

## Languages

|         |                         |
|---------|-------------------------|
| Italian | Native                  |
| English | Upper Intermediate (B2) |

*Treviso, Italy*
